(a) A fifth channel becomes occupied
Expected active channels
Time / period (2π/L)
K=2
K=20
K=100
K=10000
(b) Area transferred to extra channels
Fraction of total area
Time / period (2π/L)
L=5, original phases
L=5, shifted phases
L=6, original phases
L=6, shifted phases
(c) Areas remain unequal and recur
Mean face area / K
Time / period (2π/L)
Face 1
Face 2
Face 3
Face 4
Face 5 (new)
(d) Local energy sharing also recurs
RMS face-energy deviation / K
Time / period (2π/L)
